Continuation of 5. does NOT place the application in condition for allowance because: Due to the comprising language of the instantly claimed invention, Zong et al. (1995) do read on the methods of claims 1-3; Zong et al. start with an aggregate and produce an active refolded protein. It is noted that the claims, as written, do not require controlled depressurization. The second declaration does provide sufficient evidence in the application as a whole to allow for the scope of the claims.
